

INNOVATIVE IT & TELECOM SOLUTION *Provider*

PanOptic Technology provides a range of IT and Telecoms Services to businesses of all sizes across all sectors. Our focus is on giving control and flexibility back to you, the client; providing a full range of communications services to meet your needs now and in the future.

IT and Telecoms Services

Our approach is different to other service providers – we aim to work in partnership with you. In our experience there is no 'one size fits all' solution. We work to understand your specific requirements and then apply our knowledge and experience to ensure the right technology is put in place for your business.

Integral to our partnership approach is our belief in offering the same top class service levels to all businesses regardless of size. Through the unique combination of our technology, experience and service we aim to help your business succeed.

Voice

PanOptic Technology provides a full range of telephony services to meet the needs of all types of business. Our services include:

- Traditional Voice - standard landline phone systems including ISDN2, ISDN30, and analogue lines.
- IP Voice - telephony (and multimedia) delivered over the internet bringing reduced costs, scalability and flexibility
- PBX (private branch exchange) or switchboard - provides connections between a large number of telephone lines within an organisation, including facilities such as conferencing calls without the need for separate equipment
- Voice Recording - reliably record, safely store and effortlessly playback all calls
- Mobile Solutions - we can deliver your mobile telephony whatever your chosen mobile provider.

Data Management

- Hosted Co Lo - hosted colocation facilities provide you with peace of mind that your data centre is hosted securely, with minimum cost and complexity to you, and is scalable to meet your future needs
- VDC (Virtual Data Centre) – provides improved resilience over traditional server technology and enables increased business agility, faster deployment times and reduced Total Cost of Ownership; as well as improved business continuity and disaster recovery
- Desktop Support - Support for your business anytime, anywhere, from any device.

Network Services

PanOptic Technology delivers and supports a range of data services across the UK and worldwide. By engaging with the best underlying carriers, combined with our long term local relationships globally, we have earned the reputation of being able to deliver network connectivity into the more challenging destinations on time and within budget.

- Internet Products – ADSL, Leased Line, and EFM
- Dedicated Bandwidth - Where more secure, reliable, and faster connectivity is required between two or more locations
- Managed Data Networks - ensuring multiple locations work seamlessly together and helping you achieve cost savings.

Telecoms and Technology Consultancy

PanOptic Technology offers expertise in examining and reporting on a wide range of IT and telecoms based services. Our experience allows us to act independently on the customer's behalf to inspect, advise, negotiate, provision and deliver on all aspects of your IT and Telecoms estate.

Trading Floor Specialists

Through our decades of experience working within the finance market, PanOptic Technology provides a range of managed services specifically tailored for the Trading Floor.

Our supplier agnostic approach allows us to propose the most suitable Voice Trading Platform to meet our clients' demands and budgets. Combined with our ability to integrate between traditional TDM voice and our own leading edge SIP Trader Voice platform (www.siptrader.com), PanOptic Technology has a unique Trader Voice offering that is radically changing the Trader Voice Market.

Unified Communications

Being in a position to enable your staff to work wherever, whenever, and however they need to, puts your company in a much stronger position and quite likely ahead of your competition, through cost savings and increased productivity.

At PanOptic Technology, we hold strong relationships with a whole portfolio of solutions suppliers. We also provide full project management from the initial discussions through to user profiling, implementation & training.

About Us

Our fundamental belief is to offer the best-in-market solutions and to provide the most appropriate technology for each individual business. No company is the same; it is our job to understand the specific needs of the business and to apply the right mix of solutions for each organisation.

Using the right technology, applied in the right way, at the right time and at the right price, we enable businesses to simply get on with what they do best!
